## Objective

---

Backend and Full-Stack Developer with experience building scalable web applications, REST APIs, database-driven systems, and real-time features. Skilled in Node.js, TypeScript, Python, PostgreSQL, Prisma, React, and Next.js, with additional experience in data analysis and machine learning. Strong problem-solving and debugging skills with a focus on developing reliable, maintainable, and business-focused software solutions.

## Experience

---

### Backend Developer | Sitarahub | Mumbai, Maharashtra

Jan 2026 – Present | Node.js, TypeScript, Prisma, PostgreSQL, Next.js, WebSockets, AWS S3

- Developed and maintained backend functionality for business platforms covering ERP, WhatsApp communication, lead management, user/vendor operations, and event-related workflows.
- Designed and integrated REST APIs connecting business logic, database operations, and web interfaces, with a focus on reliability, maintainability, and production-ready delivery.
- Built media-management and cloud workflows using AWS S3, including image compression, uploads, bulk processing, filtering, pagination, pricing, and failure handling.
- Contributed to real-time inbox and conversation features using WebSockets, while troubleshooting authentication, database, and application issues and collaborating through Git/GitHub, debugging, and code reviews.

### Full-Stack Developer Intern | TechElevare Pvt. Ltd. | Pune, Maharashtra

Aug 2025 – Dec 2025 | React.js, Node.js, Express.js, MySQL, Python, Scikit-learn

- Developed responsive web interfaces and reusable React components for business applications, contributing to both frontend and backend modules.
- Built and integrated REST APIs using Node.js and Express.js with MySQL-backed workflows, including database integration, feature development, and debugging.
- Integrated Python and Scikit-learn functionality into application workflows to support data-driven features and application requirements.
- Worked in an Agile development environment, collaborating with team members to troubleshoot issues, implement features, and deliver assigned modules.

## Projects

---

### GPSERP – WhatsApp ERP System

- Developed a WhatsApp CRM and Marketing Automation platform powered by the official Meta WhatsApp Business Cloud API, supporting bulk messaging, automated campaigns, real-time customer conversations, lead management, templates, catalogs, and multi-tenant business management.
- Designed and implemented end-to-end full-stack functionality, including bulk message queuing, webhook processing, delivery tracking, real-time chat, role-based access, authentication, campaign management, and production deployment.
- **Tech Stack:** Next.js, React, TypeScript, Node.js, Express.js, PostgreSQL, Prisma, Redis, BullMQ, AWS S3, Tailwind CSS, Meta Graph API.

### IGTF - B2B Trade Fair Platform

- Developed a digital platform for managing large-scale B2B trade fairs, connecting exhibitors, investors, franchisors, and visitors while streamlining the complete event registration and participation process.
- Enabled organizers to manage registrations, leads, exhibitors, stalls, payments, events, and participant interactions through a centralized management system, supporting 400+ exhibitors and 6,000+ buyers across 16 industry sectors.
- **Tech Stack:** Next.js, TypeScript, Django REST Framework, PostgreSQL, Tailwind CSS, AWS S3, CloudFront, Resend, Twilio.

---

## DARZI - Garment Alteration Marketplace

- Developed Darzi, an on-demand garment alteration marketplace connecting customers with verified local tailoring studios, offering transparent pricing, online booking, order tracking, and OTP-based pickup verification.
- Engineered a geo-dispatch system that matches customers with nearby studios using expanding search radii and geospatial filtering, alongside a 9-stage order lifecycle for managing the complete alteration process.
- **Tech Stack:** Next.js, React, Express.js, Prisma, PostgreSQL, AWS, Google Maps API.

## Skills

---

|                                    |                                                                      |
|------------------------------------|----------------------------------------------------------------------|
| <b>Programming Language</b>        | Python                                                               |
| <b>Frontend Technologies</b>       | HTML, CSS, JS, React, Node.js, Next.js, TypeScript, Tailwind Css     |
| <b>Backend Technologies</b>        | Django, REST API, Express.js, SQL, PostgreSQL, Prisma, Postman       |
| <b>Deployment Technologies</b>     | Git, GitHub, AWS                                                     |
| <b>Data &amp; Machine Learning</b> | Pandas, NumPy, Scikit-learn, Matplotlib, Seaborn                     |
| <b>Soft Skills</b>                 | Critical Thinking, Data Structures & Algorithms, Database Management |

## Education

---

**B. Tech in Computer Engineering | Government College of Engineering, Yavatmal 2021 – 2025**

CGPA: 8.2/10

**HSC | Bhartiya Mahavidyalaya, Amravati 2020 – 2021**

84.80%

**SSC | Dnyanmata High School, Amravati 2019**

77.60%

## Certifications

- 
- Google Cybersecurity Professional Certificate
  - Google AI Essentials
  - Google Cloud Computing Foundations
  - Cisco Data Analytics Essentials
  - Accenture Data Analytics & Visualization Job Simulation
  - Cybersecurity Fundamentals

## Positions of Responsibility

---

### Python Backend Development Partner

- Served as a Core Software Development Member, taking ownership of major technical decisions and key development responsibilities across multiple projects.
- Worked as a Full Stack Developer, designing and implementing both frontend and backend systems, API's, database integration, and end-to-end application functionality.
- Led the complete project lifecycle from development to deployment, ensuring scalable, reliable, and production-ready applications while actively contributing to critical project milestones.

## Achievements

- 
- Published a Scopus-indexed research paper on Covert Data Intelligence and secure information-hiding techniques.
  - Solved 100+ coding and algorithmic problems across competitive programming platforms.
  - Participated in academic hackathons and collaborative software engineering projects.
